## **METRON 20 Laser Distance Meter**

### **All Key Measurement Functions in One Compact Device**

The new METRON 20 laser distance meter from SOLA combines the four key measurement functions in one compact and user-friendly device. With a maximum measurement tolerance of just  $\pm 2 \text{ mm}^*$ , it ensures precise results for a variety of applications at distances of up to 20 m.

#### **Versatility and Precision**

The METRON 20 is equipped with all the basic functions needed for a variety of measurements: length measurement, area measurement, volume measurement, and continuous measurement. Whether it's measuring a room, calculating the area for flooring, or determining wall surfaces for painting, the METRON 20 is ready for any measurement task.

#### **Compact and User-Friendly**

Measuring only 10.5 cm in length and featuring an ergonomic design with soft grip, the METRON 20 fits comfortably in the hand and allows for easy operation. The single-line backlit display with large readout ensures that measurement results can be clearly and quickly read in all lighting conditions.

#### **Precise Measurements Thanks to Integrated Spirit Level**

The integrated small spirit level in the METRON 20 is particularly helpful. This ensures that the device is correctly positioned for horizontal measurements, enabling precise measurements to be carried out. This function is especially useful when millimeter-accurate results are required.

#### **Convenient Accessories for On-the-Go**

The METRON 20 comes with a practical belt case, a strap, and two 1.5V (AAA) batteries. This makes the device ready for use at any time and can be conveniently carried anywhere.

\*Accuracy is valid up to 10 m. For distances between 10 and 20 m, the maximum tolerance may degrade by 0.1 mm/m.

### About SOLA-Messwerkzeuge GmbH:

Since 1949, passion for precision motivates SOLA to develop and manufacture highly accurate and durable measuring and marking tools in construction. In addition to the well-known spirit levels, the product range includes screeding levels, folding rules, tape measures, squares and rulers, measuring wheels, laser distance meters and laser devices. SOLA's approach is to develop and continuously optimize its products to match its customers' requirements as closely as possible. SOLA Measuring Tools are sold in more than 80 countries around the world. 75% of all products are manufactured in Götzis, Austria, where the headquarters and production facility are located. This is where 200 employees develop, manufacture and distribute a product range of more than 1,500 products. The high-quality standards that SOLA has set for itself are subjected to constant control in the company's own laboratories. For more information visit [www.sola.at](http://www.sola.at)
